

The Swiss Federal Institute for Forest, Snow and Landscape Research WSL is part of the ETH Domain. It employs approximately 500 people working on the sustainable use and protection of the landscapes and habitats and a responsible approach to handling natural hazards. The Research Unit of Land-Resources Assessment is monitoring and analysing the change of landscapes and forests. The Research Group of Inventory Design and Planning is looking for a

Environmental Statistician / Biometrician

You enhance the estimation procedures of the Swiss National Forest Inventory (lfi.ch) which are applied on varying topical, spatial and temporal scales, publish the results in scientific journals, and utilise your expertise in international research projects, in the consultation of national and regional authorities, and as an academic teacher.

Your qualifications: PhD in Forest/Environmental Sciences, profound understanding of sampling and probability theory, work experience in environmental statistics and biometry, familiarity with environmental research, independent, systematic work-style, (knowledge of German is an advantage). You are an innovative and committed team player.

Interested? Please send your complete application, including photo, using **reference number 562** to Mrs. Monika Huber, Human Resources WSL, Zuercherstrasse 111, CH-8903 Birmensdorf, Switzerland. Dr. Adrian Lanz, Tel. +41-(0)44 739 24 51, will be happy to answer any questions or offer further information.
